Mohammed Abdalla

Egypt | moha.gora.app123@gmail.com | github.com/mohammed-goraney | linkedin.com/in/mohammed-abdalla-it

Professional Summary

Entry-level Network, Cloud, and DevOps practitioner with hands-on lab experience in enterprise network design, OSPF, VLANs, HSRP, EtherChannel, Docker Compose, Linux administration, and container communication. Completed a Bachelor of Science in Information Technology in 2026 and actively seeking junior opportunities in Network Engineering, NOC Operations, Cloud Support, Linux Administration, or DevOps.

Technical Skills

- **Networking**: Cisco IOS, CCNA/CCNP-aligned networking, OSPF, VLANs, inter-VLAN routing, HSRP, EtherChannel, STP/RSTP, NAT/PAT, port security, DHCP Snooping
- **Cloud & Systems**: Azure-focused infrastructure learning, Linux administration, system troubleshooting, shell scripting, virtual networking
- **DevOps & Containers**: Docker, Docker Compose, Redis, PostgreSQL, container networking, environment variables, Docker logs, CI/CD fundamentals
- **Tools & Programming**: Git, GitHub, Python, Node.js, .NET Worker services, network diagrams, technical documentation

Hands-on Projects

Network Design and Configuration Lab, Enterprise Campus Network — CCNP ENCOR Lab 2025--2026

- Designed an enterprise network simulation using a three-tier Core, Distribution, and Access architecture.
- Configured OSPF dynamic routing, VLAN segmentation, inter-VLAN routing, HSRP gateway redundancy, EtherChannel, STP/RSTP, NAT/PAT, DHCP Snooping, and port security.
- Documented a topology with dual Layer 3 core/distribution switches and segmented HR, Finance, IT, and Sales networks.

Containerization and Troubleshooting Lab, Docker Example Voting App Lab 2026

- Orchestrated five services with Docker Compose: Vote App, Redis, Worker, PostgreSQL, and Result App.
- Built service communication over a shared Docker network and used environment variables for configuration.
- Troubleshot container communication and background-worker behavior with docker logs; practiced Redis queue and PostgreSQL persistence patterns.

Education

Bachelor of Science in Information Technology Egypt

Completed 2026

- Foundation in computer systems, networking, and system administration.

Certifications & Training

- **Networkat**: Seven training certificates covering networking, cloud, security, and Linux, including CCNA 200-301-aligned and CCNP-aligned study.
- **Packt / Coursera**: ENCOR (350-401) v1.1, Advanced Routing and Network Management, Network Security and Automation, and Enterprise Network Design and Virtualization.
- **KodeKloud**: Docker for Beginners with Hands-on Labs.
- **IBM**: Introduction to DevOps; Artificial Intelligence Fundamentals.
- **World Food Programme / Super Fny Consulting**: Training Accomplishment Certificate in Light Current Systems, 40 training hours, 2026.
- **UNHCR / Terre des hommes**: Certificate of Recognition for Sport for Protection Training of Trainers, 2025.

Professional Development

- Completed structured learning across networking, DevOps, cloud infrastructure, Linux, containerization, facilitation, communication, and time management.
- Built a bilingual technical portfolio documenting learning milestones, architecture diagrams, and hands-on case studies.
